QGIS Application - Bug report #15583
raster classes cannot be adjusted, only by using the +/- buttons

2016-09-19 09:14 AM - Donovan Cameron

Status:	Closed		
Priority:	Normal

Affected QGIS version:	2.16.2	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23507

Description

I've tested on both Windows (via OSGeo4W installer) and arch linux.

Trying it with both a GRASS raster and a GeoTIFF DEM.
Then setting render type to "Singleband Pseudocolor".

For Arch Linux, when I press "Classify" it adds the five classes but "Classes" can't actually be changed or adjusted, like it's greyed out.

On Windows, when pressing "Classify" it generates up to 9 classes instead of the default 5.

In both instances, pressing the +/- buttons still works to manually add or remove classes so there is a workaround.
