

## QGIS Application - Bug report #15605

### Query Builder Test button returns message with inadequate number of rows

2016-09-22 05:45 AM - Nikolay Lebedev

<b>Description</b>		
<p>Tested in provider filter layer property on a postgis layer. When generating a where clause with Query Builder and hitting Test button the message comes up and says 'The where clause returned N rows'. N in this case is the total number of rows in the table, not the number of filtered rows. Then the filter itself works fine - I can see an expected number of rows in attribute table, etc.</p> <p>I guess this was done to speed up this message, but it's quite handy and gets a bit confusing seeing the same number of rows (total) returned when testing different queries.</p> <p>Tested on master (e7c9400, python3, qt5), 2.16 and 2.14.</p>		

#### History

##### #1 - 2017-04-27 06:10 AM - Alexander Bruy

- Operating System deleted (Arch Linux)
- Category changed from Forms to Data Provider

##### #2 - 2017-05-01 01:03 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

##### #3 - 2019-03-09 04:28 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please check if this issue is still valid on QGIS 3.4.5 or 3.6.
