

QGIS Application - Feature request #15618

Integrate isselected() expression function from ExpressionsPlus plugin in core

2016-09-26 07:34 AM - Andreas Neumann

Status:	Closed	Resolution: Copied to github as #: 23541
Priority:	Normal	
Assignee:		
Category:	Expressions	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>The "Expressions plus" plugin contains a useful function named isselected('layername'). This would be useful for a wider user base to test a feature against the selection state, e.g. for filtering Atlas to the selected range.</p> <p>It would be good if this expression function could be ported to C++ and integrated with QGIS core.</p>
