QGIS Application - Bug report #15619
ERS format not available in drop down file type menu for gdalwarp and gdal_translate

2016-09-26 09:06 AM - Thomas Campagne

Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23542

Description

I have noticed that for some time now the ERS raster format has not been available in the drop down file type menu of the output file selection window for Warp (gdalwarp) and Translate (gdal_translate).

That said it is still possible to save a raster to ERS by editing the gdal command line at the bottom of the window by setting "-of ERS". But doing this brings an error message about a failed output file creation despite creating the desired ERS grid file.

Is there a specific reason for the ERS format to be omitted from the output file types?

If not, could it be added?

Thanks

I am running QGIS 2.16.3 on a Windows 10 64bit.
