<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 23560
<b>Description</b>		
<p>In <i>Add ArcGIS MapServer Layer</i> window, there's Export button. Suddenly doesn't work as suspected. I have defined some services, and now should be possible to export them. But list of defined services is from WFS, not ArcGIS MapServer. In that way, cannot save and share this resources.</p>

##### #4 - 2016-10-20 08:26 PM - Martin Dobias

Turns out the support for import/export of connections for arc rest services was never there, so for the meanwhile I have just removed those buttons in the

respective dialogs to avoid confusion.
