

QGIS Application - Feature request #15657

Differentiate relative/absolute path option for QGS and QLR files

2016-10-03 03:22 AM - Dominique Lyszczarz

Status:	Open	Resolution: Copied to github as #: 23580
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>Actually the option under project properties to define relative or absolute save paths affects both QGS and QLR files. I think it could be better if we can separate the option for these 2 types of file.</p> <p>In my use case, I prefer using absolute path in QGS project because I rarely move layers but I often reuse and move project files. On another hand, I prefer relative path when I save a new QLR because most of the case I save my QLR in the same folder than the source layer so I can easily move or share a layer with its associated QLR files without break the link.</p>
