

QGIS Application - Feature request #15662

Support setting custom HTTP headers in WMS layer request

2016-10-04 03:57 PM - Jerome Anthony

Status:	Open	Resolution: Copied to github as #: 23585
Priority:	Normal	
Assignee:	Jerome Anthony	
Category:	Browser	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
Allow addition of custom HTTP headers when adding a WMS layer. This will be useful when user wants to use for instance JWT authentication using 'Authorization' header.
