

QGIS Application - Bug report #15699

drag'n'drop from legend doesn't ask for confirmation of removal

Crashes QGIS or corrupts data:	No	Copied to github as #: 23622
Description When dragging layers from legend of a first QGIS app to another one the layers are removed from it. I think it would be better either: <ul style="list-style-type: none">- ask for removal or not- just drop in new app without removing from first one
