

QGIS Application - Bug report #15705

composer table item: inlined color picker inaccessible within the "advanced customization..." pop up dialog

2016-10-13 10:13 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 23628
Description		
<p>An issue has slipped into the composer table item in master whereas the inlined color picker panel is inaccessible when opening it from the item's "advanced customization..." pop up dialog.</p>		
Steps to reproduce		
<ol style="list-style-type: none">1. Create a new project, and open a new composer window2. Add a attribute table item to the newly-opened composer3. Switch to the item properties panel, and click on the [advanced customization...] button (in the appearance section)4. Activate the checkbox of any of the items in there, and click on the color picker button to open it5. Notice how the color picker opens as an inlined panel within the item properties panel, which happens to be inaccessible due to the opened pop up dialog
