

QGIS Application - Bug report #15712

Dissolve function crash QGIS 2.16.3

2016-10-16 01:25 PM - Soren Lindqvist

Status:	Rejected	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.16.3	Regression?: No
Operating System:	Mac OSX	Easy fix?: No
Pull Request or Patch applied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 23635
Description <p>I have a polygon layer with about 12000 polygons, I want to dissolve by using an ID field using "vector-geoprocessing tools-dissolve". Most often it crashes when trying to run the process or it runs forever. Last time I tried it was running for 3 days and only about 25 % in progress bar before I needed to force quit. I have tried with temporary file and also to save the file = same result. I can categorise (style) with the ID field and it works fine, but to dissolve it does not work at all.</p> <p>Hoping I could get around the problem I also tried with the plugin "Dissolve with stats", but it crash all the times for me.</p> <p>Thanks</p> <p>Soren</p>

Did see the issue #15707. I also tried the "Dissolve all" and it seems to take ages to finish similar to the one I stopped after 3 days...
