

QGIS Application - Bug report #1575

QGIS crashes while attempting to change symbology to continous color

2009-03-13 10:18 PM - gowin -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 11635
Description		
I'm running QGIS 1.0.1 under 64-bit Ubuntu 8.10. When doing this, I get the following errors:		

History

#1 - 2009-03-21 09:12 AM - Paolo Cavallini

I tried to reproduce the bug on Debian 64bit, but I cannot. Please test again and let us know the specific conditions in which this happens: is this only with a specific file, or all? In the first case, can you send us a small samle that is causing the crash?

#2 - 2009-03-21 09:16 AM - Paolo Cavallini

- Resolution set to duplicate
- Status changed from Open to Closed

Apparently a duplicate of #1393
