

## QGIS Application - Bug report #15801

### labelling: curved placement fails when string used contains zero-width character(s)

2016-11-02 07:53 PM - Mathieu Pellerin - nIRV

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>	Mathieu Pellerin - nIRV	
<b>Category:</b>	Labelling	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 23721
<b>Description</b>		
<p>A number of scripts rely on zero-width character(s) (Indic-based scripts, Arabic, etc.), which triggers a failure in the PAL curved placement code.</p> <p>I've stumbled on this on qgis master (what will become 3.0), shocked I haven't spotted this before now.</p> <p>PR coming in an instant.</p>
