

QGIS Application - Feature request #15817

Add an "offset" property to first level symbol (needed for the "Offset point symbols" tool)

2016-11-06 11:24 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 23737
Priority:	Normal	
Assignee:		
Category:	Map Tools	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>To use the rotate point symbol, one can define a rotation field at the first level of symbol layers and have the tool usable.</p> <p>To use the offset point symbol, there's no offset option at the first level, meaning that user needs to set the offset field for all symbol layers of the symbol if he wants the global symbol moved.</p> <p>This is not a consistent behavior between these two tools, imho.</p>
