

QGIS Application - Bug report #15818

Cached WFS GetCapabilities

2016-11-06 11:27 AM - Thomas Bildsoe

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WFS	
Affected QGIS version:	2.16.1	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 23738
Description		
<p>I have a WFS server with a PostGIS data source. Layers are often added, and when I call the WFS GetCapabilities directly in a web-browser I see the new layers.</p> <p>However in QGIS when I connect to the WFS server I can't see the new layers. It is as if the layers was cached on first connect, and the cache never expires.</p> <p>In my opinion there should be no cache on WFS GetCapabilities.</p> <p>QGIS version 2.16.1-Nødebo QGIS code revision 8545b3b Compiled against Qt 4.8.5 Running against Qt 4.8.5 Compiled against GDAL/OGR 2.1.0 Running against GDAL/OGR 2.1.0 Compiled against GEOS 3.5.0-CAPI-1.9.0 Running against GEOS 3.5.0-CAPI-1.9.0 r4084 PostgreSQL Client Version 9.2.4 Spatialite Version 4.3.0 QWT Version 5.2.3 PROJ.4 Version 492 QScintilla2 Version 2.7.2</p>

- Status changed from Open to Closed

Problem was with expiration headers.

Not a QGIS bug.
