

QGIS Application - Bug report #15835

Colour assigned with variable not shown in legend

2016-11-10 05:27 PM - Kate Callan

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.14.8	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 23755
Description I have defined a number of global variables to hold colour hex codes. When I use them via the data-defined colour option, the features successfully change colour in the map and composer windows, but the colours shown in the style dialog, layers panel and legend do not update to show the applied colours.
