Affected QGIS version:	2.18.0	**Regression?:**	No
Operating System:	UBUNTU 16.04	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	23784

Description

Dear forum
I have to handle a big point vector file.
To be more precise I would like to select all the points with attribute NULL in the only column I have (it works) and then deleting.
QGIS try to carry out the operation but at the end it crashes.

I can't attach the file because is 40 Mb

Thank you very much

History

#1 - 2016-11-21 10:52 AM - Giovanni Manghi

- Target version deleted (Version 2.18)

- Priority changed from Normal to High

- Status changed from Open to Feedback
