QGIS Application - Bug report #15873
DB Manager: add and edit table: several issues with data types

2016-11-21 11:01 PM - Paolo Cavallini

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	DB Manager		
Affected QGIS version:	3.0.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23791

Description

In create table:

- field types are limited; in particular, timestamptz is missing
- SRID has to be entered by hand; the projection widget should be added

In edit table:

- Table properties -> Field properties: the field `Length` appears wrong; for geom it shows `geomtype,srid`, for varchar(255) and others, adding a length will cause an error:

    ALTER TABLE "public"."buffer_union" ALTER "round" TYPE varchar(255) (24)

    length has to be entered by hand changing varchar(255) into e.g. varchar(20)

In general, the interface should be cleaned up.

History

#1 - 2017-05-01 01:02 AM - Giovanni Manghi

- Regression? set to No

- Easy fix? set to No

#2 - 2018-02-24 04:26 PM - Paolo Cavallini

- Description updated

Still true in QGIS 3

#3 - 2018-02-24 05:04 PM - Giovanni Manghi

- Affected QGIS version changed from master to 3.0.0

Please update the affected version.

#4 - 2019-03-09 03:12 PM - Giovanni Manghi

- Status changed from Open to Closed

- Resolution set to end of life

End of life notice: QGIS 2.18 LTR
