

QGIS Application - Bug report #15880

Symbol Size assistant: Values greater than 1 000 000 are not "correctly" rendered in the legend

2016-11-22 08:12 AM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.14.8	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 23798
Description From a point marker symbol, click on the size assistant button and use expression or field that returns values greater than 1000000. The label of circles is rendered in the format 1.01e+06 which is not really readable and understandable in the layer panel or print composer legend, when the range of values is not too large. While I know these are large values, it may be nice to have them rendered as plain number (not sure of the correct terminology). Still apply in 2.18
