

QGIS Application - Feature request #15882

Symbol Size assistant: updating the circle size according to values manually entered

2016-11-22 08:17 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 23800
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>When setting a proportional symbol with the size assistant, there's a widget showing circles and their value. Currently, user can click the label and change the values, and validate. But nothing happens (see #15881).</p> <p>It'd be nice if the size of the circle near the value could change accordingly.</p>

- *Description updated*

For record, In 3.0, this label is no longer editable but I think this feature request could still be valid : allow user to have a customized legend
