

QGIS Application - Bug report #15928

Calling plugin from standalone script has a bug because the use of progress bar

2016-12-02 03:09 AM - Juanma Font

Status: Closed	
Priority: Normal	
Assignee:	
Category: Processing/Core	
Affected QGIS version: 2.18.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: not reproducible
Crashes QGIS or corrupts data:	Copied to github as #: 23845
Description	
<p>I have a standalone script that call:</p> <pre>general.runalg("qgis:linestopolygons",inFile,outFile)</pre> <p>and only the first feature is write to outputfile.</p> <p>I discover that if I comment out the line that says: "progress.setPercentage(int(current * total))" into the file /usr/share/qgis/python/plugins/processing/algs/qgis/LinesToPolygons.py then all features are write to output file.</p> <p>Tested in Linux Qgis 2.18.1</p>
