

QGIS Application - Bug report #15934

QGIS crashes when deleting items in the print composer

2016-12-04 04:53 AM - R. R.

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.18.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 23850
Description		
<p>I have some troubles here when deleting items in the print compser. QGIS crashes often when doing this. I've to save the composer as template and create a new composer to 'fix' this bug.</p>

- Status changed from Open to Feedback

Hi, this is impossible to troubleshoot if you don't add other details and a sample project+data.

Why a regression? the same project on a older qgis version works as expected?

#2 - 2017-01-26 02:59 AM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

Closing for lack of feedback.

#3 - 2017-03-07 01:47 AM - Giovanni Manghi

I tested you sample project and data, an on both 2.18.4/linux and master/windows deleting objects from composers didn't lead to crashes.
