

QGIS Application - Bug report #1596

Action tab in vector layer properties does not warn you, if action name is not set

2009-03-25 12:54 PM - jachym -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Vectors	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11656
Description		
<p>If you are adding some action to the vector file and do not set the action name (from whatever reason), the action is added to the list of actions, you can close the Properties window and try the action in the map. But there is no action defined and if you reopen the properties/actions diaplog, no action is in the list.</p> <p>It would be good to disable the Insert action button, if all input fields are not filled with some value.</p>		

History

#1 - 2009-04-15 08:49 PM - Gary Sherman

- Resolution set to fixed
- Status changed from Open to Closed

Fixed at commit:4a943d12 (SVN r10576)
