

QGIS Application - Bug report #15968

Identify results panel: tweaks for usability

2016-12-11 03:52 AM - Paolo Cavallini

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 23884
Description The panel requires IMHO a bit of love: <ul style="list-style-type: none">- when querying several rasters, a too deep tree is displayed- the closed state of tree is restored at each query, so the user is required a lot of useless clicks- the column widths are not shrunk to actual data, so sometimes the value column is hidden, other times data are truncated, and it is not always easy for the user noticing of these missing info.		

History

#1 - 2016-12-11 03:53 AM - Paolo Cavallini

- File identif1.png added

See attached

#2 - 2016-12-11 03:59 AM - Paolo Cavallini

IMHO `Band1` should be removed everywhere for singleband rasters.

The attached image could be replaced by:

```
{{{
Slope2 17.44
+ Derived
Slope1 17.44
+ Derived
}}}
```

etc.

#3 - 2017-05-01 01:01 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#4 - 2018-02-24 04:24 PM - Paolo Cavallini

- Description updated
- Affected QGIS version changed from master to 3.0.0

Looks unchanged in QGIS 3

#5 - 2019-03-09 03:12 PM - Giovanni Manghi

- *Status changed from Open to Closed*
- *Resolution set to end of life*

End of life notice: QGIS 2.18 LTR
