Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	23896	

Description

Dear Support,

We are encountering problems with storing the QGIS Snapping Set-up. I've been encountering this since version 2.8 (the earliest that I used).
I know that the default settings can be configured here:
Snapping.png

But the last selected Snapping mode is never stored. We always have to reset this with every command or when QGIS restarts.
Snapping_Options.png

I hope you can improve this feature. Thank you very much.

Best regards,

Josha Ancheta

- Status changed from Open to Feedback

- Category changed from Browser to Digitising

It resets the snapping setting according to your defaults...and not the latest settings. This is a general behaviour, same as your canvas CRS when you open a new QGIS session. You don't expect QGIS to set it to the latest CRS used?

#2 - 2017-01-02 06:54 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed
