Description

Building qgis 2.18.2, I get the error

```
python/core/sip_corepart0.cpp:18732:28: error: 'QGeoSatelliteInfo' was not declared in this scope
```

A quick workaround is to comment out the line

```
%Include gps/qgsqtllocationconnection.sip
```

in the file

```
src/core/qgis.h
```

(patch attached).

For information, my complete build command:

```
mkdir build
cd build
