Pull Request or Patch supplied:		**Resolution:**	invalid
Easy fix?:	No	**Copied to github as #:**	23956

Description

OGC Geopackage seems promising format for sharing and editing spatial data.

As far as I can see, QGIS supports only core geometry types from OGC Geopackage.

It would be good if QGIS would support also its additional geometry types (including arcs) as described in Geopackage standard:

http://www.geopackage.org/spec/#extension_geometry_types

History

#1 - 2017-01-05 11:12 AM - Nyall Dawson

- Resolution set to invalid

- Status changed from Open to Closed

They are already supported, so long as you have a recent enough gdal version (>2)
