Description

I can make a geometry like this:

> *pol = [[[QgsPoint]](0,0),QgsPoint(0,1),QgsPoint(1,1)]*
> *[[QgsGeometry]].fromPolygon([pol])*

<qgis.core.QgsGeometry object at 0x998aeac>

but if I do:

> *pol = []*
> *[[QgsGeometry]].fromPolygon([pol])*

- crash:

Fatal: ASSERT failure in QVector<T>::operator[]: "index out of range", file /usr/include/qt4/QtCore/qvector.h, line 320
- this happened when a selection tool I wrote was trying to create a geometry from a list of coordinates that it hadn't filled yet.
Carson Farmer had the same problem.
