| **Crashes QGIS or corrupts data:** | | **Copied to github as #:** | 11666 |

### Description

If I delete a geographical object, and as a consequence also its record on the table, then I try to ask to delete the same record from the table, QGIS crashes:

Warning: QObject: Do not delete object, 'unnamed', during its event handler!

## History

**#1 - 2009-06-10 08:41 AM - Lorenzo Masini**

See suggestions for refesh button in #1416.

**#2 - 2009-07-08 08:33 PM - Lorenzo Masini**

Mistake. The right ticket is #1459.

**#3 - 2009-07-20 11:58 PM - Paolo Cavallini**

*- Resolution set to fixed*

*- Status changed from Open to Closed*

It now does not crash IFAICT
