### Description

When I create a new layer from CSV files, point is not generated.
The source of layer is :
file:///D:/travail/MATA/AVRANCHESt.csv?encoding=System&type=csv&delimiter=;&decimalPoint=,&xField=X&yField=Y&spatialIndex=es&subsetIndex=no&watchFile=no

In the file PB_layer_propertie, you can see that I can't parametrize style.

## History

**#1 - 2017-02-27 02:02 PM - Giovanni Manghi**

- *Priority changed from Severe/Regression to Normal*

- *Category set to Data Provider/Delimited Text*

- *Status changed from Open to Feedback*

Please attach sample data.

**#2 - 2017-02-28 12:31 AM - dany Lefeuvre**

- *File AVRANCHESt.csv added*

Hi, with sample data in EPSG:2154. I try with the last version of LTR and testing, I have the same problem.

**#3 - 2017-02-28 11:30 AM - Giovanni Manghi**

- *Resolution set to invalid*

- *File Screenshot_20170228_193559.png added*

- *Status changed from Feedback to Closed*

The X/Y values have a space in the middle of numbers that must be striped.

Once you do that the point text layer imports as expected and you have the styling options. See attached image.
