

## QGIS Application - Bug report #16078

### Wrong encoding in file open / save dialog

2017-01-15 05:27 AM - marish -

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	GUI	
<b>Affected QGIS version:</b>	2.18.2	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> end of life
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 23993
<b>Description</b>		
<p>File open / save dialogs are using wrong encoding to list files and thus it is not possible to access non-Latin files and folders. This has been affecting QGIS for some time, I just have been lazy to report.</p> <p>Gentoo Linux ~AMD64</p> <pre>locale LANG=lv_LV.UTF-8 LC_CTYPE=lv_LV.utf8 LC_NUMERIC=lv_LV.utf8 LC_TIME=lv_LV.utf8 LC_COLLATE=lv_LV.utf8 LC_MONETARY=lv_LV.utf8 LC_MESSAGES=lv_LV.utf8 LC_PAPER=lv_LV.utf8 LC_NAME=lv_LV.utf8 LC_ADDRESS=lv_LV.utf8 LC_TELEPHONE=lv_LV.utf8 LC_MEASUREMENT=lv_LV.utf8 LC_IDENTIFICATION=lv_LV.utf8 LC_ALL=</pre> <p>QGIS versija 2.18.2 QGIS koda revīzija 7fe7a19 Kompilēts priekš Qt 4.8.7 Darbina ar Qt 4.8.7 Kompilēts priekš GDAL/OGR 2.0.3 Darbina ar GDAL/OGR 2.0.3 Kompilēts priekš GEOS 3.5.0-CAPI-1.9.0 Darbina ar GEOS 3.5.0-CAPI-1.9.0 r4084 PostgreSQL klienta versija 9.4.9 SpatiaLite versija 4.3.0 QWT versija 5.2.3 PROJ.4 versija 492 QScintilla2 versija 2.9.3 Šī QGIS kopija raksta atklāšanas informāciju.</p>

End of life notice: QGIS 2.18 LTR

Source:

<http://blog.qgis.org/2019/03/09/end-of-life-notice-qgis-2-18-ltr/>

QGIS 3.4 has recently become our new Long Term Release (LTR) version. This is a major step in our history – a long term release version based on the massive updates, library upgrades and improvements that we carried out in the course of the 2.x to 3x upgrade cycle.

We strongly encourage all users who are currently using QGIS 2.18 LTR as their preferred QGIS release to migrate to QGIS 3.4. This new LTR version will receive regular bugfixes for at least one year. It also includes hundreds of new functions, usability improvements, bugfixes, and other goodies. See the relevant changelogs for a good sampling of all the new features that have gone into version 3.4

Most plugins have been either migrated or incorporated into the core QGIS code base.

We strongly discourage the continued use of QGIS 2.18 LTR as it is now officially unsupported, which means we'll not provide any bug fix releases for it.

You should also note that we intend to close all bug tickets referring to the now obsolete LTR version. Original reporters will receive a notification of the ticket closure and are encouraged to check whether the issue persists in the new LTR, **in which case they should reopen the ticket.**

If you would like to better understand the QGIS release roadmap, check out our roadmap page! It outlines the schedule for upcoming releases and will help you plan your deployment of QGIS into an operational environment.

The development of QGIS 3.4 LTR has been made possible by the work of hundreds of volunteers, by the investments of companies, professionals, and administrations, and by continuous donations and financial support from many of you. We sincerely thank you all and encourage you to collaborate and support the project even more, for the long term improvement and sustainability of the QGIS project.
