QGIS Application - Bug report #16124
Style made with 2.12 causes crash

2017-01-26 07:44 AM - Jean-Roc Morreale

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Symbology		
Affected QGIS version:	2.18.2	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24036

Description

Hi,

We just upgraded QGIS from 2.12 to 2.18.3, it went smoothly except for one user getting multiple crashes on a project. It seems that a classified style made with 2.12 is causing a MVC++ error (R6025) or just a crash each time a duplicated layer is used.

Here are the steps to reproduce the crash :
- start a new project and add ue.gpkg
- duplicate the layer
- activate the layer

It has been reproduced on 4 computers.

History

#1 - 2017-02-04 02:50 AM - Giovanni Manghi

- Priority changed from Normal to High

#2 - 2017-03-06 03:33 PM - Giovanni Manghi

- Status changed from Open to Feedback

No crashes on 2.18.4 on the same platform.

#3 - 2017-04-29 05:33 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback, please reopen if necessary.
