

## QGIS Application - Bug report #16130

### WFS Duplicate Features

2017-01-29 02:31 PM - colin east

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Unknown	
<b>Affected QGIS version:</b>	2.18.2	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 24042
<b>Description</b>		
<p>I'm using a WFS served by Geoserver 2.7.0. I have one layer that has an ID that is unique. The IDs range from 1 to 48. If I use ArcGIS 10.4 Interoperability extension, QGIS 2.6.0 or QGIS 2.18.0 then I get the correct number of features. If I use 2.18.3 running on Windows 10 then I get twice the number of records. It seems the request is made twice and I get one record set appended to another.</p>		

#### History

##### #1 - 2017-02-16 08:35 PM - colin east

- % Done changed from 0 to 100
- Status changed from Open to Closed

This issue was with the geoserver WFS setting, which were not server persistent FIDs.
