Description

Dear all,

The "Raster calculator" module of SAGA does not work properly. It does not provide the correct result after any kind of calculation. Is it possible to fix it?
The affected version is the 2.1.2 one. It seems to be the only one provided anyway. I have indicated the "2.2.0" in the prefilled bug report form because the "2.1.2" is not proposed.

All the best

QGIS 2.1.2 is too old. Please test with latest QGIS 2.14 and/or 2.18
