QGIS Application - Bug report #16243
Crash while using Geo-reference Layer

2017-02-27 01:53 PM - James Harvey

Status:	Closed		
Priority:	High		
Assignee:			
Category:	C++ plugins/Georeferencer		
Affected QGIS version:	2.18.3	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24153

Description

I had a Geo-reference raster layer cause a crash while trying to pan the view (hand pan view icon) around on my screen.
It could just be a memory issue on my side, but it would be nice if something could be done to improve this. The Georeference tiff was 41mb in size.

History

#1 - 2017-03-06 04:03 PM - Giovanni Manghi

- Priority changed from Normal to High

- Status changed from Open to Feedback

- Category set to C++ plugins/Georeferencer

Can you provide the raster, the gcp points and georeferencer config details?

#2 - 2017-03-21 02:57 PM - James Harvey

I didn't have the points saved on that sorry. I'll look to give it another try soon and save the details to catch that error for you.

#3 - 2017-04-29 05:35 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed
