QGIS Application - Bug report #16283
Renaming a PostGIS table in the browser does not work as expected

2017-03-04 11:50 PM - R. R.

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Browser			
Affected QGIS version:	2.18.4		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	wontfix
Crashes QGIS or corrupts data:			**Copied to github as #:**	24193

Description

When users rename a PostGIS table in the browser, the primary key, the index and the sequence of the table are not renamed.

History

#1 - 2017-03-04 11:51 PM - R. R.

- File 16283.mp4 added

#2 - 2017-05-01 01:01 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#3 - 2018-02-25 10:46 PM - Luca Lanteri

It's not seem an error to me. Renaming a table doesn't imply the pkey and index renaming.

#4 - 2018-02-25 10:53 PM - Giovanni Manghi

- Status changed from Open to Feedback

No rename.

I personally think this is a "wontfix".

#6 - 2018-02-25 11:28 PM - Giovanni Manghi

- Resolution set to wontfix

- Status changed from Feedback to Closed
