Category:	DXF export	
Affected QGIS version:	2.18.4	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 24229
Description DXF export does not generate separate layers for each chosen source layer. Instead it generates many numbered layers (1 layer for each feature), so it results in an unuseful dxf file. How to reproduce: -load the 2 shapes in Files.zip -DXF Export... -Check the result dxf in cad-application.
