Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24232

Description

Building in a lean dir with 8 parallel processes failed with this error for me:

    error: @INCLUDE = /usr/src/qgis/build/master/qgsversion.inc: not found!

Subsequent invocation of make with no -j switch worked fine.

Sounds like an incomplete dependency file in CMake configuration files

This happened as of commit:5e6d540bbc4b90fb6ccb74c5847d22093050bec9
