QGIS Application - Bug report #16340
Layers within an embedded group are not displayed on the map

2017-03-10 12:08 PM - Laurence Bechet

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Unknown		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:		**Copied to github as #:**	24250

Description

Layer/Embedded layers and groups...

If you open a layer from a 'parent' project is is displayed on the map of the 'child' project (normal behaviour).
If you open a group of layers from a 'parent' project, the group with its layers appears in the 'child' project's layer panel but the layers are un-ticked and not displayed on the map. If you tick them, they still don't get displayed.

windows 8 pro 64bits
QGIS version 2.99.0-Master QGIS code revision e097904

History

#1 - 2017-05-01 01:01 AM - Giovanni Manghi
