

QGIS Application - Feature request #16420

Add postgis Layer tool : set default row height in the layer list

2017-04-07 01:53 AM - Mathieu Bossaert

Status:	Open	Resolution: Copied to github as #: 24329
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>Good morning,</p> <p>In the "add postgis Layer" tool, when I list the available tables in the database, the height of each row is set automaticaly to show all of the content of each column.</p> <p>In my case, it is generally the comment column that set the row height. I like to comment database objetscs in PostgreSQL (for example to store the query I wrote to create the table).</p> <p>As you could see in the attachment, it would by quite useful to set a default and fixed row height in the list, wich could be modify with the mouse if I want to read the whole comment.</p> <p>Mathieu Bossaert</p>
