QGIS Application - Feature request #16430
Expression Builder dialog should list the preset layers' visibilities

Easy fix?:	No	**Copied to github as #:**	24339

Description

In the map composer item, you can lock layers in the map using preset visibility option. You can even "data-defined" its locked state (using presets or layer list).

However, in the data-defined button options, there's no way to easily find the layers' name (see #11680) nor the preset visibilities' name.
