Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 24384
Description		
Anytime you open the vector layer properties --> Source tab, the Settings frame appears empty. It should instead show "Data source encoding" option. You need to collapse and expand the frame before the option appears. In case, I'm on Windows 10, master f1d4ac3
