This should be fixed with this commit:4923e46a6d1cfceb93069c41b723af98d42db8a2

I believe, Kyngchaos installer just needs updated to newer 2.18 tagged code release.

- *Status changed from Open to Closed*

- *Resolution set to fixed/implemented*

All fine installing from brew on 10.12.4

<https://github.com/OSGeo/homebrew-osgeo4mac>

packages must be updated.
