Description

confirmed in 2.18/3.X. follow these steps to replicate:

1) create a layer (tested with shape and mapinfo) with a column attribute.

2) add some features and save. You can also edn editing and close attribute table

3) open attribute table

4) start editing

5) with shift pressed => select all features => latest feature cell is opened in editing

5) click on "delete features" action button => crash!
