Crashes QGIS or corrupts data:		Copied to github as #: 24422
Description		
It is very difficult to read the names of the inactive tabs in the Plugin Manager. The inactive tab names are shown in white text against a light grey background. I'm using using the Fusion Style with the UI Theme is Default.

Is this only a Ubuntu/Unity thing? I'm on Ubuntu/KDE and is ok. I also didn't noticed anything on Windows or macOS.

I've just checked on my laptop which uses Ubuntu 16.10 and the Gnome desktop and I also get the same problem with the Plugin Manager.

I think it depends on the 'Theme' you use?

Here in Debian/Gnome3 I have either 'Fusion' or 'Windows' as Qt theme to choose from, in both it is hardly readable (white text on grey background).

Attached both theme versions. The Windows theme has some padding problems too.
