

QGIS Application - Bug report #16517

Locked raster layers do not refresh in Composer

2017-05-04 09:10 PM - Assaf Wunsch

Status:	Closed	
Priority:	High	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	2.18.7	Regression?: Yes
Operating System:	Ubuntu 16.04 LTS	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 24423
Description <p>I recently upgraded from V2.12 (I think) to V2.18.7. After upgrade, I noticed that locked raster layers are not displayed in the Composer. Vector layers, and their labels, do appear correctly. Panning or changing zoom level of the map in the Composer does not solve the issue. Also, toggling "Lock styles for layers" before saving and re-opening does not have an effect. The raster layers appear again only after I uncheck "lock layers" and hit "update preview".</p> <p>This occurred with both a DEM (GeoTiff .tif) and an ortho (.sid).</p> <p>I upgraded using the OSGeo installer. I tried rolling back to an earlier version, but the installer only allowed rolling back to V2.18.6, where the problem persists.</p>

This is working on latest 2.14.14 LTR but not anymore on 2.18.7.

Added some screens, does the same behaviour for other raster like WMTS sources

This is a Regression.
