Description

Open a print composer, add an attribute table
In Item properties --> Feature Filtering, the "Maximum rows option is set to 30 by default.
When you do not know the number of rows that could be returned by the attribute settings, manipulating this limit is not obvious (I actually put a big value).

Would be nice to have this as a checkbox:

- unchecked state means to show all the rows;
- and checked state enable the spinbox and offers the user ability to fill the maximum value.
