QGIS Application - Bug report #16531
DB manager/browser should not show the schemas/tables the user has no permission on

2017-05-09 01:29 PM - Giovanni Manghi

Status:	Feedback		
Priority:	Normal

Category:	DB Manager		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24437

Description

When choosing the "add PostGIS layer" dialog the user is presented with ONLY the schemas he/she has permission (USAGE) on.

On the other hand in DB Manager and Broswer the user is also presented with the schemas that he/she cannot use, the tables are also listed in DB Manager (not the browser) but if the user tries to add them gets an error.

For sake of consistency those schemas should be shown to the user.
