

Status:	Feedback	Resolution:  Copied to github as #: 24446
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
It would be nice to be able to specify the maximum number of characters or pixels a legend column could be. If the legend item is longer than the value, it would automatically display the item's text on several lines in order to fit the width of the column.
