

QGIS Application - Bug report #16541

QGIS crashes when choosing the option "SVG fill" or "SVG Marker" in the Style tab of Layer Properties

2017-05-12 04:16 AM - Patrice Pineault

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.18.7	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 24447
Description		
<p>It happens when I choose anything SVG-related when styling a layer. It just hangs forever as soon as I select the option. Sometimes, QGIS crashes with a "mini dump" notice. Sometimes it doesn't and I manually kill the process after a while.</p> <p>It was happening in 2.16 also. I upgraded to 2.18.7 to see if it would resolve the bug but it doesn't.</p> <p>I used SVG a few weeks ago with the 2.16 version on the very same machine. I don't know why it crashes now.</p>		

History

#1 - 2017-05-12 11:57 AM - Giovanni Manghi

- Priority changed from Normal to High
- Status changed from Open to Feedback

Can you please:

- try without any 3rd party plugun and clean configs (backups and remove the .qgis2 folder)
- attach sample project/data/symbols

thanks!

#2 - 2017-05-26 04:58 PM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed

Closing for lack of feedback.
