

QGIS Redmine (QGIS bug tracker) - Bug report #16554

Issues summary misses "Support" requests

2017-05-16 11:04 AM - Sandro Santilli

Status:	Open	
Priority:	Normal

Pull Request or Patch supplied:		
Description		
<p>The https://issues.qgis.org/projects/qgis-redmine page shows a summary of issues, but only reports "Bug report" and "Feature request" kind of issues. This means the many "Support" issues are not summarized there.</p> <p>While filing this issue I see that the "Tracker" selection box only shows "Bug report" and "Feature request" too, so maybe the existing tickets in the "Support" tracker are just form the previous deploy ?</p>
